

CoreSlash Technologies

"We Become Your Invisible Engineering Team."

Company Overview

CoreSlash Technologies is a premier, high-velocity software engineering company that operates as the silent technical engine behind global digital agencies, software startups, and enterprises. Headquartered in Belagavi, Karnataka, India, CoreSlash specializes in translating complex user experiences (Figma briefs, product requirements) into robust, scalable frontends, optimized API gateways, and custom intelligence layers.

Mission Statement

We become your technology partner so you can focus on growing your business while we build, automate, and scale everything behind the scenes.

Vision Statement

To establish CoreSlash as the world's most trusted white-label development partner, defining the global benchmark for secure, high-speed, and completely sanitized software delivery.

What We Do

CoreSlash Technologies bridges the gap between digital design and complex database logic. We build products across the following core capabilities:

CoreSlash Solutions
Web Engineering
Custom Software
Technical SEO & Speed
AI & Business Automation
Mobile Application Dev

Why Agencies Partner With Us

We help agencies deliver high-quality software while staying completely behind the scenes.

- **100% White-Label Delivery**

We work under your brand, ensuring your clients only see your business.

- **Seamless Team Integration**

We collaborate through your preferred communication and project management tools.

- **Flexible Scaling**

Easily increase or reduce your development team based on project needs.

- **Transparent Project Execution**

Agile development with regular updates and clear milestones.

- **Reliable Global Support**

Dedicated support with smooth collaboration across different time zones.

Services & Solutions

- **Web Development**

We build fast, responsive, and modern websites using the latest technologies for businesses and agencies.

- **Custom Software Development**

We develop secure web applications, ERP, CRM, dashboards, APIs, and business management systems tailored to your requirements.

- **AI & Business Automation**

We create AI-powered chatbots, AI agents, workflow automation, and smart business solutions to improve productivity and reduce manual work.

- **SEO & Performance Optimization**

We optimize websites for speed, search engines, and better user experience to improve online visibility and conversions.

Technology Stack

We build using modern, vetted technologies that ensure speed, structural security, and cross-platform flexibility:

Frontend	Backend	Databases	Cloud & DevOps	AI & Automation
React (SPAs)	NestJS (Modular APIs)	PostgreSQL (Relational)	AWS (EC2, S3, RDS)	OpenAI API (GPTs)
Next.js (SSR/SSG)	Node.js (Runtime)	MySQL (Relational)	Docker (Containerization)	LangChain (AI Logic)
Tailwind CSS	Python (FastAPI / Django)	MongoDB (NoSQL)	NGINX (Reverse Proxy)	Vector DBs (Pinecone)
Vite (Build Tool)	Go (High Concurrency)	Redis (Caching / Queues)	GitHub Actions (CI/CD)	Workflow Webhooks

CoreSlash
